**FOR THE SUCCESSFUL
STSM GRANT HOLDERS**

THE PHILOSOPHY

Short Term Scientific Mission (STSM)

A **Short-term scientific missions (STSM)** is one of the many **COST Action Networking Tools**.

COST is the a European framework supporting trans-national cooperation among researchers, engineers and scholars across Europe.

An **Action** is a science and technology network open to researchers and stakeholders, set up to achieve specific objectives within their four-year duration, centred around the creation, diffusion and application of knowledge gathered.

Short Term Scientific Missions are exchange visits between researchers involved in a COST Action, allowing scientists to visit an institution or laboratory in another COST country. They are aimed at fostering collaboration, sharing new techniques and infrastructure that may not be available in other participants' institutions or laboratories. STSM are intended especially for young researchers. They contribute to the scientific objectives of the specific Action.

THE REPORT

STSM Scientific Report

Within 4 weeks of the completion of the STSM the grantee is required to submit to the host institution, and to the STSM coordinator, a short scientific report (maximum 4 pages) with the following information:

Purpose of the STSM

Description of the work carried out during the STSM

Description of the main obtained results

Future collaboration with host institute (if applicable)

Future publications (if applicable)

Confirmation by the host institute of the successful execution of the STSM

Other comments (if any)

Before the Application

Then you go for it!

You get the approval

Before Travelling

communicate with
your host
schedule your activities
buy your ticket
arrange accomodation

During your STSM

After the STSM

CONGRATULATIONS & KEEP DOING BEST WORK!
